```
Thm4. 18 (Sylow's Theorem)
|G| = P^{\alpha}m, P + n
(2)
P \in Syl_{P}(G), Q \leq G : P - subg.
\Rightarrow \exists g \in G \text{ s.t. } Q \leq gPg^{-1}
\xi(\Gamma, Q \in Syl_{P}(G)) \Rightarrow P \xrightarrow{conj.} Q
i.e. \exists g \in G. \text{ s.t. } Q = gPg^{-1}
(3)
```

(3)  $n_p \equiv 1 \pmod{p}$  79c  $\forall P \in Syl_p(G) \quad n_p = |G: N_G(P)|$   $n_P \mid m$
